

ELIKA Series by

Innovation in Motion

Marzocchi Pompe is a leading Italian manufacturer of high-performance external gear pumps and motors, known for precision, reliability, and compact design. With over 50 years of expertise, Marzocchi serves global industrial and mobile hydraulic applications with innovative, efficient solutions.

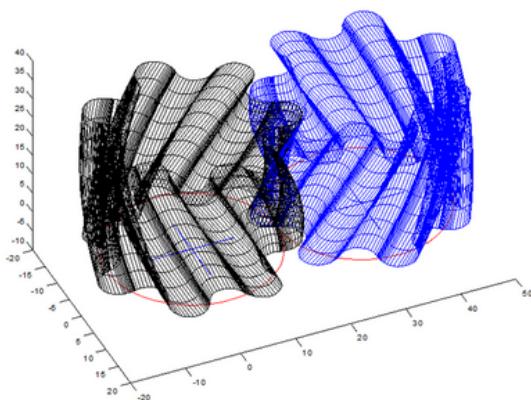

Are **noise reduction and efficiency** your top **priorities** in hydraulic systems?

Meet ELIKA - the next generation of low-noise, high-efficiency external gear pumps from Marzocchi Pompe.

The ELIKA Series is designed with a unique helical gear profile that ensures:

- Minimal noise emissions
- High volumetric efficiency
- Reduced vibration and pulsation
- Smooth operation even at low speeds

ELIKA2

ELIKA3

ELIKA4

ELIKA MULTIPLA

KEY FEATURES:

- Innovative helical gear design
- Lower noise emissions by up to 15 dBA
- Compact and modular construction
- Maximum pressure of 300 bar
- Interchangeable with standard gear pumps
- Displacement ranging from 7 to 200 cc/rev
- Single-direction configuration, with clockwise or counterclockwise rotation

Ideal Applications

Industrial Sector

Medical Equipment

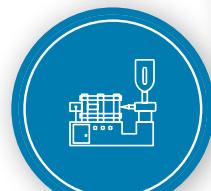

Automotive sector and Microhydraulics

New Energy Sources

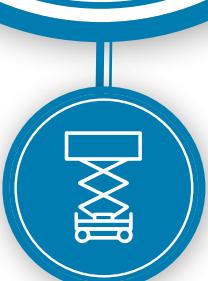

Material Handling

Plastic injections Molding machines

Municipality & Sweepers

Machine Tools and Test Equipments

Presses and Waste compactors

Lifting Platforms
